

# steam shower and whirlpool bath

## Antonio

1700mm x 900mm x 2220mm

The Antonio is a rectangular shaped, free-standing shower with a large 25cm monsoon rain shower, hand shower and riser, body jets and a powerful 3kw steam generator. The Antonio has a full size Whirlpool bath with 6 whirlpool jets, chromotherapy underwater light and a headrest for your comfort. Inside are two built in towel rails and glass shelf. The steam pod also has a special tray to allow aromatherapy products, such as eucalyptus to be used to infuse the steam - great to help relieve the symptoms of colds.

RRP: **£2399.99**

*For more information on this model and to find your nearest AquaLusso stockist, please visit our website.*

This steam shower requires between 1 and 3 bar of water pressure and can be supplied from a combi boiler, pressurised system etc. For gravity fed or low pressure, installing a twin impeller pump is recommended. Where water pressures are not balanced (of equal pressure) fitting a Pressure Equalising Valve is required to protect the Thermostatic Valve from damage. Our showers are designed to be freestanding, water should be made available to the shower into the corner (if corner fitting) or central at the back (if the shower fits against one wall) and be fed to a point approximately 1mtr from the floor and finished ready for 15mm compression fittings.

Two 13 amp fused spurs are required to provide electricity to the shower. The shower is supplied with an RCD fitted for your safety. AquaLusso showers are supplied ready to build. All boxes are able to enter through regular doorway openings, details of carton sizes are available on our website. Please also consider access for the boxes up and round stairwells etc.
