

# steam shower

## Baywood 850

1300mm x 850mm x 2170mm

The Baywood 850 is an elongated styled steam shower cabin with deep tub base. Inside the Baywood is a large monsoon shower to give you a drenching shower, a hand shower with multi function head, to provide different spray types to suit your mood. An invigorating foot massager to relieve your aching feet and finally a powerful steam generator to create a relaxing clouds of steam. The Baywood also has a glass shelf, FM radio to entertain you and ozone cleaning to help eliminate the build up of mould and germs. The Baywood is an ideal alternative to a regular shower giving you a mini bath; ideal for children to bathe.

PRICE: **£1199.99**

For more information on this model please visit our website. To order, please call us on **01423 522 222**

This steam shower requires between 1 and 3bar of water pressure and can be supplied from a combi boiler, pressurised system etc. For gravity fed or low pressure, installing a twin impellor pump is recommended. Where water pressures are not balanced (of equal pressure) fitting a Pressure Equalising Valve is required to protect the Thermostatic Valve from damage. Our showers are designed to be freestanding, water should be made available to the shower into the corner (if corner fitting) or central at the back (if the shower fits against one wall) and be fed to a point approximately 1mtr from the floor and finished ready for 15mm compression fittings.

A single 13 amp fused spur is required to provide electricity to the shower. The shower is supplied with an RCD fitted for your safety.

Bathtek showers are supplied ready to build. All boxes are able to enter through regular doorway openings, details of carton sizes are available on our website. Please also consider access for the boxes up and round stairwells etc.

For full, detailed installation requirements of all Bathtek showers, please call our customer service department on 01423 522 222 or visit our website at [www.bathtek.com](http://www.bathtek.com)

*Ozone (o3) Cleaning. Ozone is a highly effective natural steriliser that can inactivate practically any organic contaminant on contact. By releasing Ozone into the cabin, we are able to safely decontaminate your shower. The ozone feature helps you keep your shower hygienic.*

The Baywood is also available as 1150mm x 900mm
