

steam shower

Sanford 900

900mm x 900mm x 2300mm

The Sanford 900 is low step entry steam shower cabin. Having all the same great features found on our other models, but with ample internal height making this ideal for those looking for extra headroom. The Sanford 900 has an attractive presence, with its pillar effect frame and tinted glass. The Sanford also offers one of the largest and most comfortable seats of our range, proving especially suited for those who are looking to use the shower in a seated position often. The shower has a fluorescent low voltage roof light, o3, fan, mirror, ample storage shelves and built in FM radio to enjoy whilst you shower.

For more information on this model please visit our website. To order, please call us on **01423 522 222**

This steam shower requires between 1 and 3bar of water pressure and can be supplied from a combi boiler, pressurised system etc. For gravity fed or low pressure, installing a twin impeller pump is recommended. Where water pressures are not balanced (of equal pressure) fitting a Pressure Equalising Valve is required to protect the Thermostatic Valve from damage. Our showers are designed to be freestanding, water should be made available to the shower into the corner (if corner fitting) or central at the back (if the shower fits against one wall) and be fed to a point approximately 1mtr from the floor and finished ready for 15mm compression fittings.

A single 13 amp fused spur is required to provide electricity to the shower. The shower is supplied with an RCD fitted for your safety.

Bathtek showers are supplied ready to build. All boxes are able to enter through regular doorway openings, details of carton sizes are available on our website. Please also consider access for the boxes up and round stairwells etc. For full, detailed installation requirements of all Bathtek showers, please call our customer service department on 01423 522 222 or visit our website at www.bathtek.com

The Steam Pod. The steam generator produces clouds of steam that enter the cabin from the steam pod. You can put Aromatherapy products into the tray of the pod and infuse the steam - ideal for relieving the effects of colds.

The Sanford is also available as 800mm x 800mm
